

2D Laser Barcode Scanner

This handheld scanner utilizes laser technology to decode 1D and 2D barcodes quickly. It is suitable for retail, warehousing, and logistics applications, offering reliable and comfortable scanning.

Overview

High-Performance Data Capture

This handheld 2D laser barcode scanner is engineered for rapid and precise data acquisition in demanding environments. Utilizing advanced laser technology, it efficiently decodes both 1D barcodes and complex 2D codes, including QR codes. Its ergonomic, durable construction ensures comfort and reliability for intensive use in retail, warehousing, and logistics operations.

Technical Specifications

Supported Symbolologies	1D Barcodes, 2D Barcodes, QR Codes
Scanning Technology	Laser
Form Factor	Handheld

Usage & Application

Ideal For

- Retail
- Warehousing
- Logistics

Design & Build

Durability

Durable Construction • Ergonomic Design

Integration

System Integration	Compatible with a range of interfaces
