

# 2G 3G 4G Mobile Signal Repeater

This mobile signal repeater enhances 2G, 3G, and 4G network coverage. It amplifies weak cellular signals to ensure reliable voice and data communication.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Signal Enhancement

This triple-band mobile signal repeater is engineered to significantly improve 2G, 3G, and 4G cellular reception in areas with weak coverage. By amplifying signals from mobile network operators, the device ensures clearer voice quality and more reliable data speeds for both residential and commercial environments. It features a robust design with integrated safety mechanisms to prevent network interference and provides real-time signal monitoring for optimized performance.

## Technical Specifications

### Power Requirements

**12 V**

Voltage

**2 A**

Current

### Supported Frequency Bands

900MHz, 1800MHz, 2100MHz

### Network Compatibility

2G, 3G, 4G, GSM, DCS, WCDMA

## Features

### Status Indicators

- Signal Strength (Signal 1, 2, 3)
- Power Status
- Real-time monitoring LED
