

2V 200Ah Gel Battery for Solar/Wind Energy Storage

This 2V 200Ah gel battery is designed for solar and wind energy systems. It provides efficient and reliable energy storage for renewable energy applications.

Product Overview

Reliable Energy Storage Solution

This 2V 200Ah Gel battery is engineered for high-performance solar and wind energy storage applications. Its advanced gel electrolyte technology ensures a maintenance-free, safe, and efficient power source for long-term off-grid or hybrid energy systems. Designed for durability, this deep-cycle unit provides consistent performance across various renewable energy environments.

Technical Specifications

Nominal Voltage	2 V
Nominal Capacity	200 Ah
Dimensions	170 x 105 x 340 mm
Unit Weight	12.9 kg

Commercial Terms

Item Number	CNFJ-200
Minimum Order Quantity	24
Production Lead Time	8-10 days

Certifications

Product Certifications	CE
