

2V 500Ah Gel Battery for Renewable Energy Storage

The 2V 500Ah Gel Battery is designed for efficient energy storage in solar and wind power systems. Utilizing gel electrolyte technology, this maintenance-free battery ensures long-lasting and stable power supply.

Product Overview

Reliable Renewable Energy Storage

The 2V 500Ah Gel Battery is specifically engineered for high-performance solar and wind energy storage systems. Utilizing advanced gel electrolyte technology, this unit offers a maintenance-free operation with enhanced durability and safety for off-grid and backup power solutions. Its design ensures a consistent and stable power supply, making it an ideal choice for demanding renewable energy applications.

Technical Specifications

Nominal Voltage	2 V
Nominal Capacity	500 Ah
Rating Basis	10hr

Physical Dimensions

Dimensions (L x W x H)	240 x 170 x 340
Weight	30 kg

Logistics

Item Number	CNFJ-500
Minimum Order Quantity	24 pcs
Production Lead Time	8-10 days

Certifications

Compliance	CE, PV-Ready
------------	--------------
