

2W Osram LED Module

High-performance 2W Osram LED module is designed for diverse lighting applications. The module features efficient heat dissipation and consistent light output, ensuring optimal performance in diverse environments.

Product Overview

High-Performance LED Illumination

This high-performance 2W LED module is engineered for versatility across a wide range of lighting applications, including signage and architectural lighting. Featuring robust construction and efficient heat dissipation, it ensures long-lasting reliability and consistent light output. Its compact, energy-efficient design allows for seamless integration into existing systems and easy installation in diverse environments.

Technical Specifications

Ingress Protection Rating

IP65

Power Consumption

2 W

Input Voltage

12V DC

Recommended Applications

Signage, Architectural Lighting, General Illumination

Key Features
