

3-30mm Tube Cutter

This tube cutter is designed for cutting copper, aluminum, and thin-walled steel tubes. It has a sharp cutting wheel made of hardened steel and a built-in reamer.

Product Overview

Professional Tube Cutting Precision

This manual tube cutter is designed for precision cutting of copper, aluminum, and thin-walled steel tubing. It features an ergonomic control knob for seamless pressure adjustment, ensuring clean edges every time. The tool is equipped with a high-durability alloy steel blade and an integrated reamer for professional deburring of pipe ends. Its rugged aluminum body is built to withstand demanding plumbing and HVAC environments.

Technical Specifications

Cutting Diameter Capacity

3 mm

Minimum Diameter

30 mm

Maximum Diameter

Material Composition

Alloy Steel Blade, Aluminum Body

Key Features

Integrated Features

- Hardened alloy steel cutting wheel
- Ergonomic pressure adjustment knob
- Built-in deburring reamer
- Durable aluminum construction

Compatible Pipe Materials

Copper • Aluminum • Thin-walled Steel
