Overview

High-Performance Diesel Forklift

This robust diesel-powered forklift is engineered for demanding material handling tasks, offering a lifting capacity between 3 and 3.5 tons. Designed for versatility, it features a unibody frame for structural integrity and an ergonomic operator space to ensure comfort during long shifts. With options for various engine types and mast heights up to 6.5 meters, this machine is an ideal solution for warehouses, construction sites, and manufacturing facilities.

Performance Specifications

Lifting Capacity

3 Ton
