

3-6T Side-Loading Forklift

This side-loading forklift efficiently lifts and transports long, bulky loads in narrow aisles. With a 3-6 ton capacity, it minimizes the need for wide turning spaces.

Overview

Specialized Side-Loading Capability

The 3-6T Side-Loader Forklift is engineered specifically for the efficient handling of long, bulky, and elongated materials such as lumber and pipes. Its unique side-loading mechanism allows for parallel transport, drastically reducing the aisle width requirements compared to standard forklifts. Designed for industrial environments where space optimization is critical, this equipment combines robust lifting power with precise hydraulic control.

Technical Specifications

Lifting Capacity

3 T

Minimum Capacity

6 T

Maximum Capacity

Suitable Materials

Lumber, Pipes, Elongated Materials, Bulky Loads

Operational Features

Key Operational Benefits

- Side-loading mechanism for narrow aisle operation
- Robust mast and fork assembly for stability
- Smooth hydraulic control system
- Ergonomic operator cabin with enhanced visibility

Space Saving Design

Yes
