

3-Core HVAC Rubber Flexible Cable

300/500V 4.0mm²

This 3-core rubber flexible cable is designed for HVAC applications, including air conditioning systems. It features tinned copper conductors with color-coded insulation and a durable black rubber jacket, rated for 300/500V with a 4.0mm² cross-sectional area.

Overview

Professional HVAC Cable Solution

This 3-core rubber flexible cable is engineered specifically for HVAC and air conditioning systems. Rated for 300/500V, it provides reliable power and control connectivity in demanding environments. The design features a durable black rubber outer jacket for enhanced flexibility and protection, ensuring long-term performance in climate control applications.

Technical Specifications

Voltage Rating	500 V
Cross-sectional Area	4 mm ²
Number of Cores	3
Conductor Material	Tinned Copper
Core Insulation Colors	Brown, Blue, Green/Yellow

Compliance & Standards

Environmental Compliance

RoHS • PAHs • REACH • POPs • CA65
