Overview

Compact Power Solution

This 3 HP air-cooled diesel engine is a robust and compact power source engineered for versatility and reliability. Designed for efficiency, it features an easy-start mechanism and simple maintenance requirements, making it an ideal choice for powering small agricultural machinery, portable generators, and water pumps. Its durable construction ensures consistent performance even in demanding operational conditions.

Technical Specifications

3 HP
Rated Power

Engine Type: Air-Cooled Diesel Engine

Model Designation: 168F

Compliance & Standards

Certifications: CE, ISO 9001:2008

Features

Key Features

- Easy start mechanism
- Efficient combustion system
- Low fuel consumption
- Simple maintenance design
- Integrated air filter and fuel tank

Applications

Suitable Applications

Agricultural Machinery • Portable Generators • Water Pumps • Small Industrial Equipment • Tillers
