

3-Inch Submersible Deep Well Pump

This submersible pump is designed for deep well applications. It features a 3-inch diameter, cast iron outlet, and plastic impeller for efficient water extraction.

Product Overview

3-Inch Submersible Deep Well Pump

This high-efficiency submersible pump is specifically engineered for water extraction from deep wells. Featuring a compact 3-inch diameter design, it is suitable for narrow boreholes while maintaining reliable performance. The combination of a durable cast iron outlet and a plastic impeller ensures a balance of strength and efficient fluid handling for various water supply needs.

Key Metrics

Core Specifications

3 inch

Pump Diameter

Technical Construction

Outlet Material	Cast iron
Impeller Material	Plastic
Build Features	Submersible, Deep Well Design, 3-Inch Slim Profile

Application

Primary Application	Efficient water extraction from deep wells
