

3-Inch Submersible Deep Well Pump with Plastic Impeller

This submersible deep well pump efficiently extracts water from wells. It has a 3-inch diameter, a plastic impeller, and an optional cast iron outlet.

Overview

Reliable Deep Well Water Extraction

This 3-inch submersible deep well pump is engineered for efficient water extraction, making it an ideal choice for irrigation, domestic water supply, and drainage systems. Featuring a durable plastic impeller and a robust construction, it is designed for extended service life in demanding environments. The slim 3-inch profile allows for easy installation in narrow wells while maintaining reliable performance.

Technical Specifications

Pump Diameter

3 inch

Diameter

Outlet Material Option

Cast Iron
