

# 3-Mode 38mm Rotary Hammer Drill

This rotary hammer operates in three modes: rotary hammer, rotary only, and hammer only. It is designed for drilling and demolition, with a robust motor and ergonomic handle.

## Overview

### Professional Performance

This 3-Mode Rotary Hammer is designed for heavy-duty drilling and demolition tasks. It features three modes of operation: rotary hammer, rotary only, and hammer only, offering versatility for various applications. Built with a robust motor and durable components, this tool is engineered to withstand demanding job site conditions while providing an ergonomic handle for reduced user fatigue.

## Technical Specifications

|                          |            |
|--------------------------|------------|
| Input Power              | 1050 W     |
| Impact Energy            | 9 J        |
| Loading Rotational Speed | 320 r/min  |
| Blows Per Minute         | 2900 min-1 |
| Max Bit Diameter         | 38 mm      |

## Electrical & Physical

|                   |                  |
|-------------------|------------------|
| Voltage/Frequency | 220V-240V / 50Hz |
| Weight            | 5.7 kg           |

## Features

### Operation Modes

- Rotary Hammer
- Rotary Only
- Hammer Only

### Key Benefits

Heavy-duty • Ergonomic Design • Versatile
