Product Overview

High-Performance 3-Point Disc Plough

The 1LY series disc plough is a fully-suspended tillage implement designed for use with four-wheel tractors. Engineered for versatility, it excels in challenging soil conditions, including land with weeds, stems, and frictional soil containing bricks. Its rotary disc motion ensures efficient soil turning without clogging, making it a reliable solution for primary tillage and field preparation.

Key Features

Operational Advantages

- Tractor-mounted 3-point suspension (Type II)
- Anti-clogging design prevents grass winding
- Effective crop stalk cutting capability
- Adjustable disc angle for customized tillage
