Product Overview

Professional Soil Preparation

This 3-point mounted disc plough is engineered for high-efficiency primary tillage behind four-wheel tractors. Designed to excel in challenging soil conditions containing weeds, stems, or small debris, the rotating discs ensure a clog-free operation without winding grass. Its robust construction minimizes working resistance while effectively turning and aerating the soil to create an ideal seedbed.

Technical Specifications

Linkage System	Three-point suspension II type
Working Depth	300 mm

Performance Data

Model Comparison Table

Model	Working Width (mm)	Discs (Qty)	Weight (kg)	Power Req (hp)
1LY(T)-325	750	3	420	50
1LY(T)-425	1000	4	490	90
1LY(T)-525	1250	5	565	120
1LY(T)-625	1500	6	640	160

Key Features

Operational Advantages	No Winding Grass, Non-Blocking, Low Resistance, Soil Aeration
