

# 3-Pole AC Magnetic Contactor 30A 24-277V for HVAC

This definite purpose contactor is designed for motor control applications. It is suitable for heating, air conditioning, refrigeration, data processing, and food service equipment.

## ADDITIONAL IMAGES

## Product Overview

### Reliable HVAC Control

This 3-pole magnetic contactor is engineered specifically for demanding HVAC and refrigeration applications. It provides robust switching capabilities for compressors, pumps, and other inductive loads within heating and cooling systems. Built to withstand harsh operating environments, this component ensures efficient electrical circuit control and reliable performance.

## Technical Specifications

### Rated Current

**30 A**

Rated Current

<b>Pole Configuration</b>	3 Poles
<b>Operating Voltage Range</b>	24-277V AC
<b>Safety Standards</b>	UL, CE

## Ordering & Logistics

### Payment Terms

- 30% deposit
- Balance against B/L copy

### Customization Options

OEM Available • ODM Available

<b>Typical Delivery Time</b>	15-20 days after deposit
