Product Overview

High-Performance HVAC Contactor

This 3-pole electronic AC definite purpose contactor is engineered for demanding HVAC and refrigeration applications. It provides reliable switching for three-phase power systems, ensuring efficient operation of motors and inductive loads. Certified for safety and durability, it is a robust solution for professional electrical installations.

Technical Specifications

Rated Current

75 A

Rated Current

Number of Poles	3
Voltage Range	24V - 277V
Maximum Voltage	600 V

Compliance & Quality

Certifications

CUL Certified

Quality Control

100% self-inspection and testing before packing

Applications

Suitable Applications	HVAC, Refrigeration, Air Conditioning, Motor Switching, Inductive Loads
-----------------------	---

Commercial Terms

Service Options

- Free samples available (shipping at customer cost)
- OEM and ODM customization available
- Quality guarantee with item replacement policy

Logistics & Payment

Parameter	Details
Delivery Time	15-20 days after deposit
Payment Terms	30% deposit, balance against B/L copy
