

3-Position Push Button Switch with LED Indicator

This 3-position push button switch is designed for controlling circuits in various applications. It features an integrated LED indicator to visually confirm the switch's current position.

Overview

Specializing in production of buttons and indicators since 1997

Close-up of the robust 3-position switch mechanism with integrated LED feedback.

3-Position Illuminated Control Switch

This industrial-grade 3-position push button switch features an integrated LED indicator, providing clear visual feedback on the switch's status. Designed for demanding electrical control circuits, it utilizes high-grade anti-flame plastic and zinc alloy for durability. With silver alloy contacts for enhanced anti-electrical erosion resistance, this switch is ideal for signal, warning, and emergency control applications.

Electrical Ratings

Operating Voltages

660 V AC Voltage Max	400 V DC Voltage Max
--------------------------------	--------------------------------

Rated Thermal Current	10 A
-----------------------	------

Environmental Specifications

Protection Grade

IP40 • IP54 • IP65 • IP66 • IP67 • IP68

Operating Temperature	-5°C to +55°C
-----------------------	---------------

Relative Humidity	35-85% RH
-------------------	-----------

Standards & Compliance

Technical Standards

- IEC60947-5-1
- GB/T14048.1
- GB14048.5

Certifications

CE, ISO 9001, RoHS, UL
