Overview

Precision Planting Solution

This 3-row tractor-mounted corn seeder is designed for high-efficiency, precision agricultural operations. It integrates multiple functions including furrowing, fertilizing, seeding, covering, and pressing in a single pass. Engineered for compatibility with four-wheel tractors, it offers adjustable seeding rates to handle either single or double seeds as required.

Technical Specifications

Compatible Tractor Power

15 hp

Minimum Power

80 hp

Maximum Power

Number of Rows

3 rows

Operational Features

Seeding Configuration

- Single seed precision
- Double seed precision

Primary Benefits

Seed Saving • Precision Planting • High Germination Rate • Multi-functional

Integrated Operations

Furrowing, Fertilizing, Seeding, Covering, Pressing
