Overview

Compact Power for Versatile Operations

This 3-ton compact crawler excavator is engineered for high performance in constrained environments. Equipped with a reliable engine meeting Euro V emission standards, it delivers exceptional fuel efficiency while minimizing environmental impact. Its versatile design supports a wide range of tasks including excavation, loading, leveling, trenching, and crushing, making it an essential asset for municipal, landscaping, and construction projects.

Technical Specifications

Operating Weight	4200 Kg
Bucket Capacity	0.12 m3

Performance

Travel Speed (H/L)	3.6/2.2 km/h
Swing Speed	9 r/min
Gradeability	30 °

Design Features

Design Highlights	Compact Design, Tailless, Boom Swing, Retractable Undercarriage
Maintenance Features	New type electrical box for convenient daily maintenance
Retracted Crawler Width	990 mm
