

3-Ton Wheel Loader with 1.8 CBM Bucket

This wheel loader has a 1.8 CBM bucket capacity and a 92kW engine. It is designed for loading and moving materials on construction sites and other heavy-duty applications.

Overview

High-Efficiency 3-Ton Wheel Loader

This 3-ton wheel loader is designed for demanding material handling tasks, featuring a robust Z-type turning bucket structure that maximizes digging force. It combines a streamlined, modern appearance with a reliable engine system and a fully hydraulic steering mechanism. Engineered for versatility, it supports various attachments to adapt to diverse working environments, from construction sites to snow removal.

Performance

Rated Load Capacity	3000 kg
Engine Power	92 kW
Rated Bucket Capacity	1.8 cbm
Overall Weight	10500 kg

Technical Specs

Tire Specification	17.5-25
Dimensions (LxWxH)	8050 x 2430 x 3120 mm

Features

Key Design Features

- Automatic bucket leveling system
- Optimized computer-aided design
- Single tipping bucket cylinder
- Z-type turning bucket structure
- Integral gearbox and torque converter
- Full hydraulic steering system

Compatible Attachments	Pallet Fork, Grass Fork, Snow Blower, Snow Shovel, 4-in-1 Multi-function Bucket, Snow Bucket
