Overview

Versatile 3-Way Flow Control

This 3-way flanged ball valve is engineered for industrial applications requiring precise fluid diversion or mixing. Featuring a robust investment-cast body and an ISO 5211 mounting pad, it allows for easy automation and reliable manual operation. The valve is designed to meet international standards, ensuring compatibility across diverse piping systems.

Technical Standards

Mounting Pad

ISO 5211

Flange Connections

DIN EN1092-1 PN16, ANSI B16.5

Performance Metrics

Pressure Ratings

150 Lb

Class

16 PN

Nominal Pressure

Working Temperature

-25 to +180

Material Specifications

Available Materials

- CF8M (Stainless Steel 316)
- CF8 (Stainless Steel 304)
- CF3M (Low Carbon 316L)
- WCB (Carbon Steel)

Casting Method

Investment casting for body and cap

Operation & Design

Valve Configuration

3-Way Flanged Ball Valve

Position Indicator

Yes

Control Type

Lever handle with ON/OFF indicators
