Overview

High-Efficiency Rotary Air Compressor

This 30 HP rotary air compressor is engineered for reliability and continuous industrial operation, even in demanding conditions with temperatures up to 55°C. Featuring a robust, compact design, it offers easy installation and maintenance to minimize downtime. The unit is equipped with advanced PLC controls and an LCD interface for precise monitoring, ensuring optimal energy efficiency through automated load/no-load management.

Performance & Technical

Power Rating	30 HP
Duty Cycle	100% Continuous
Operating Modes	Load, No Load, Auto Shut-off

Electrical Specifications

Supported Voltages

- 380V, 3-phase, 50Hz
- 420V, 3-phase, 50Hz
- 380V, 3-phase, 60Hz
- 220V, 3-phase, 60Hz

Features & Design

Key Features

- Super silenced enclosure for low noise operation
- Double screw compressor design
- Fully open access doors for easy service
- LCD control panel with PLC integration
- High-efficiency motor

Certifications

ISO 9001 • CE • UL

Warranty Coverage

1 Year

Full Machine Warranty

3 Years

Air End Warranty

Applications

Suitable Industries

Power Generation, Semiconductor, Shipping, Shipbuilding, Oil & Gas, Rubber, Food Processing, Pharmaceutical, Packaging, Electronics, Cement, Chemical, Textile, Paper-making
