Overview

High-Performance 30-Ton Crawler Excavator

This 30-ton crawler excavator is engineered for high productivity in demanding environments such as earthwork, mining, and tunnel construction. It features a sophisticated engine and a negative flow control system that balances power and hydraulic load for exceptional fuel efficiency. Designed with versatility in mind, the unit supports multiple boom and bucket combinations to meet diverse operational needs.

Performance

Operating Weight	33800 kg
Bucket Capacity	1.4-1.6

Engine

Engine Model	ISUZU AA-6HK1XQP
--------------	------------------

Features

Key Advantages	Fuel Efficient, Low Emission, Low Noise, Negative Flow Control
----------------	--

Applications

Suitable Applications

- Earthwork Engineering
- Mining
- Tunnel Construction
- Digging and Crushing
