

30000 Tons/Year Washing Powder Production Plant

This is a complete plant for washing powder production with a capacity of 30000 tons per year. The facility includes processing, storage, and auxiliary structures.

Project Overview

Turnkey Washing Powder Production Solution

This industrial-scale facility is engineered to deliver an annual production capacity of 30,000 tons of high-quality washing powder. Designed for efficiency and industrial reliability, the plant integrates advanced processing architecture to meet local supply chain demands. The engineering scope encompasses comprehensive facility design, ensuring robust manufacturing performance.
