Product Overview

High-Performance Silent Power Solution

This 300KVA super silent diesel generator is engineered for reliable power generation in noise-sensitive environments such as hospitals, schools, and offices. Featuring a robust water-cooled engine and premium alternator, it delivers consistent prime power of 240kW. The unit is designed for durability and ease of use, incorporating advanced controller technology for comprehensive monitoring and protection.

Technical Specifications

Prime Power

240 kW
Prime Power

300 kVA
Prime Power

Standby Power

264 kW
Standby Power

330 kVA
Standby Power

Electrical Output

Parameter	Value
Output Type	AC Three Phase
Rated Voltage	400/230V
Frequency	50Hz
Speed	1500 RPM

Components & Configuration

Core Components

- 1506A-E88TAG5 Water-cooled Engine
- Stamford Alternator
- Deep Sea Controller

Features & Options

Key Advantages

Fuel-saving • Low Noise Level • Waterproof

Available Options

ATS, Preheater, Remote Control, Automatic Synchronization System, Trailer

Compliance & Warranty

Certifications

CE, ISO 9001

Warranty

1 year or 1200 working hours
