

304/316 Stainless Steel Flange

These stainless steel flanges are designed for connecting pipes, valves, pumps, and other equipment to create piping systems. They are available in 304 and 316 stainless steel, providing corrosion resistance and durability for various industrial applications.

Product Overview

Professional Grade Stainless Steel Flanges

These stainless steel flanges are precision-engineered for the secure connection of pipes, valves, and pumping equipment within complex piping systems. Crafted from high-quality 304 and 316 stainless steel grades, they provide exceptional corrosion resistance and long-term durability. These components are suitable for demanding industrial environments that require strict hygienic standards and reliable chemical resistance.

Material Specifications

Material Grades	304 Stainless Steel, 316 Stainless Steel
Manufacturing Method	Forging
