

30A 12V/24V Battery Charger

This is a 30A battery charger for charging 12V and 24V batteries. It includes an ammeter, voltage selector switch, and indicator lights.

Product Overview

Professional Grade Battery Charger

This 30A battery charger is a versatile solution designed for efficient charging of both 12V and 24V battery systems. Engineered for reliability, it features an integrated ammeter for real-time monitoring of charging current, ensuring precise control throughout the process. With its robust design and voltage selector switch, this unit is an essential tool for automotive, marine, and industrial maintenance applications.

Technical Specifications

Rated Current

30 A

Charging Current

Key Features

- Integrated ammeter for current monitoring
- Voltage selector switch (12V/24V)
- LED status indicator lights
- Industrial-grade construction

Supported Voltages

12V, 24V

Applications

Common Applications

Automotive • Industrial • Battery Maintenance
