

30A Power Relay

This power relay is designed for various applications requiring reliable performance. It is capable of handling high current loads and is suitable for use in industrial control systems and automotive applications.

Overview

High-Performance Power Relay

This power relay is engineered for demanding industrial and automotive switching applications. Designed for robust performance, it efficiently handles high current loads in power switching circuits. With reliable construction, this component ensures long-lasting operation in critical control systems.

Electrical Ratings

Rated Current

30 A

Rated Current

Switching Capacity

Load Type	Capacity
AC Load 1	30A @ 240VAC
AC Load 2	30A @ 125VAC

Applications

Suitable Applications

Industrial Control Systems, Automotive Applications, Power Switching Circuits
