

30A RV Power Cord with Twist Lock and Indicator Light

This 30A RV cord features a twist lock connector for a secure connection and an indicator light to show when power is flowing. It is designed for use with RVs and other recreational vehicles that require a 30 amp power supply.

Product Overview

High-Performance RV Power Solution

This 30A RV power cord is engineered for reliability and safety in demanding outdoor environments. Featuring a robust 10AWG copper construction with a durable PVC jacket, it ensures efficient power delivery for recreational vehicles. The inclusion of a twist-lock connector, integrated indicator light, and easy-grip handle makes this cord both secure and user-friendly for professional and recreational power needs.
