

# 30F<sub>4</sub> ±5% AC Capacitor

This capacitor has a capacitance of 30F<sub>4</sub> with a tolerance of ±5%. It is suitable for electric power transmission and distribution systems.

## Overview

### High-Performance AC Run Capacitor

This 30F<sub>4</sub> AC capacitor is engineered for reliability in demanding electrical environments, including power transmission and distribution systems. Designed with a ±5% tolerance, it ensures consistent performance and stability during operation. Its robust construction makes it an ideal component for maintaining efficient motor run cycles in various industrial and commercial applications.

## Electrical Specifications

Capacitance	30 F <sub>4</sub>
Capacitance Tolerance	±5%
Rated Voltage	370/440 VAC
Frequency	60 Hz

## Performance Metrics

### Key Performance Metrics

**10000 AFC**

Protection Rating

**85 °C**

Max Temperature

Climatic Category	40/85/21
-------------------	----------

## Safety & Standards

Safety Features	Protected, S2 Safety Class
