

30M Laser Distance Meter

This laser distance meter provides precise and efficient distance measurements up to 30 meters. It features a clear digital display and multiple measurement modes, including continuous measurement, area, and volume calculations.

Product Overview

Professional Precision Measurement

This 30-meter laser distance meter is a versatile tool engineered for efficiency in construction, real estate, and professional measuring tasks. It supports complex calculations including area and volume, alongside standard distance and continuous measurement modes. With an inverted backlit LCD, it ensures clear visibility even in challenging lighting conditions.

Technical Specifications

Maximum Distance

30 m
Max Distance

Measurement Modes

Distance, Area, Volume, Continuous Measurement

Display

Inverted backlit LCD

Features

Built-in Calculations

- Automatic Area Calculation
- Automatic Volume Calculation
- Addition Function
- Subtraction Function

Usability Features

- Unit Conversion
- Data Storage
