

3.0m3 Bucket Capacity 5T Wheel Loader

This wheel loader has a 3.0m3 bucket capacity and a 5-ton rated payload. It is designed for heavy-duty material handling in construction and other demanding applications.

Overview

High-Performance Wheel Loader

This 5-ton capacity wheel loader is a versatile construction machine engineered for demanding material handling tasks, including the transport of gravel, sand, and heavy aggregates. It features a powerful engine paired with a reliable transmission and axle system, ensuring efficient and sustained performance. With a focus on operator safety and productivity, it comes equipped with a modern cabin, air conditioning, and ergonomic joystick controls.

Performance Metrics

Operational Capacity

162 kW

Rated Power

3 m3

Bucket Capacity

5000 kg

Rated Payload

17300 kg

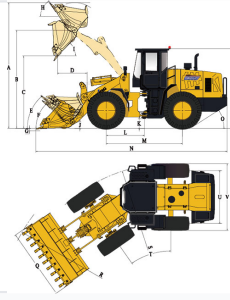

Operating Weight

Equipment Features

Standard Features

Joystick Control, AC Cabin, ROPS & FOPS Certified, Multiple Attachments, Simplified Maintenance

Dimensional Specifications

Dimension	Value	Unit
Overall Length	8100	mm
Overall Height	3380	mm
Wheel Base	3230	mm
Ground Clearance	409	mm
Dump Clearance	3080	mm
Digging Depth	50	mm
