

30T Truck Crane with 42m Boom

This truck crane features a five-section main boom with a length of 10.7m to 42m. The crane's maximum lifting height reaches 50m when equipped with a jib, and it provides a 990kN.m maximum lifting moment.

Overview

Professional 30T Mobile Crane

This versatile 30T truck crane is engineered for demanding lifting tasks in both urban construction and confined industrial environments. Featuring a high-performance 42m telescopic boom, it provides exceptional reach and capacity for varied job sites. Integrated with advanced control systems, the unit ensures high-precision operation and operator safety during complex heavy-lifting maneuvers.
