

3.0V Lithium Primary Battery CR2

This 3.0V CR2 lithium primary battery is designed for high-drain applications requiring a compact and reliable power source. Its features include a stable voltage output, long shelf life, and wide operating temperature range.

Product Overview

High-Performance Lithium Primary Power

This 3.0V CR2 lithium primary battery is engineered for high-drain applications that demand a compact and reliable power source. With a stable voltage output and high energy density, it is designed for extended runtime in professional electronic devices. Its rugged construction ensures reliable performance across a wide operating temperature range, making it an ideal choice for critical equipment.

Technical Specifications

Nominal Voltage	3 V
Battery Chemistry	Lithium Manganese Dioxide (Li/MnO ₂)

Certifications & Standards

Compliance & Certifications	CE, UL, UN, RoHS, ISO 9001, ISO 14001
-----------------------------	---------------------------------------

Applications

Typical Applications

- Electricity, water, gas, and heat meters
- Security systems
- Medical devices
- GPS tracking
- RFID technology
- Photographic equipment
- Military field equipment
