

30W 220V Electric Soldering Iron

This is a 30W 220V externally heated type electric soldering iron. It is designed for general purpose soldering tasks and is suitable for electronics repair and DIY projects.

Overview

Versatile Soldering Tool

This externally heated electric soldering iron is designed for reliability and efficiency in general-purpose soldering tasks. Featuring a rapid one-minute preheating time, it is an ideal tool for electronics repair, DIY projects, and various soldering applications. The design focuses on ease of use and adaptability, making it a practical choice for professional and hobbyist workbenches.
