

# 30W Solar LED Street Light with 6m Pole

This 30W solar LED street light is mounted on a 6-meter pole. It uses an integrated solar panel to generate power, removing the need for external wiring and lowering energy costs.

## ADDITIONAL IMAGES

## Product Overview

### Sustainable Outdoor Illumination

This 30W solar LED street light system provides a complete, off-grid lighting solution designed for streets, parking lots, and pathways. By utilizing an 18V/80W monocrystalline solar panel and high-capacity battery storage, the unit operates autonomously without the need for external wiring. The system includes a durable 6-meter pole, ensuring optimal light distribution and reliable performance in various outdoor environments.

## Technical Specifications

### Solar Panel

**18 V**  
Voltage

**80 W**  
Power

### Battery Options

- 12V/80Ah Gel Battery
- 12V/30Ah Lithium Battery

|                   |             |
|-------------------|-------------|
| LED Power         | 30 W        |
| Pole Height       | 6 m         |
| Charge Controller | 12V/24V 10A |
