

## 30x6x39 Rubber Track for Case IH 9300

This durable 30"x6"x39" rubber track is designed for Case IH 9300 agricultural machinery. It features high traction and a reinforced drive lug.

### ADDITIONAL IMAGES

### Overview

#### High-Performance Agricultural Rubber Track

This specialized rubber track is engineered for optimal performance on CASE IH 9300 series agricultural machinery and compatible undercarriage systems. Designed to provide superior traction and stability, it significantly reduces ground pressure to minimize soil compaction during field operations. The robust construction ensures an extended service life even in demanding agricultural environments.

### Key Metrics

#### Core Dimensions

<b>30 in</b> Width	<b>6 in</b> Height/Pitch	<b>39 qty</b> Length/Links

### Technical Specifications

Track Width	30 in
Pitch/Height	6 in
Length/Links	39

## Performance & Build

### Performance Features

- Enhanced stability in various field conditions
- Reduced ground pressure to protect soil health
- Robust lug pattern for maximum grip
- Minimized slippage during high-torque operations
- Smooth operation for operator comfort

### Material

High-quality rubber compounds for wear resistance

## Compatibility

### Application

Agricultural Machinery • Field Operations • Heavy-Duty Sourcing

### Compatible Equipment

CASE IH 9300, Similar Undercarriage Systems
