

316 Stainless Steel Ball Valve

This ball valve is designed for reliable flow control in industrial applications. Its 316 stainless steel construction provides corrosion resistance and longevity.

Overview

High-Performance 316 Stainless Steel Ball Valve

This high-quality ball valve is engineered for reliable flow control across demanding industrial environments. Constructed from durable 316 stainless steel, it offers exceptional corrosion resistance and longevity, even in harsh conditions. The design features a smooth, quarter-turn operation for efficient opening and closing, ensuring a tight shutoff to prevent leakage.

Technical Specifications

Material Grade	316 Stainless Steel
Operation Type	Quarter-turn

Applications

Suitable Industries	Chemical Processing, Oil and Gas, Water Treatment
---------------------	---

Performance

Key Features

- Corrosion resistant
- Tight shutoff mechanism
- Smooth operation
- Suitable for fluids and gases
