

32-Ton Topless Tower Crane

This topless tower crane is designed for heavy lifting on construction and engineering sites. With a 32-ton capacity, it efficiently handles substantial materials and allows multiple cranes to operate closely.

General Overview

High-Capacity Topless Tower Crane

The STT753-32t is a powerful topless tower crane engineered for heavy-duty lifting in large-scale construction and infrastructure projects. Featuring a robust 32-ton load capacity, it offers superior efficiency and stability on demanding job sites. Its topless configuration facilitates seamless multi-crane operation in tight environments, while the intuitive control systems ensure precision and enhanced safety.

Technical Specifications

Maximum Load Capacity

32 ton
Max Load

Key Features

Core Advantages

Topless Design, Heavy Lifting, Rapid Assembly, High Stability, Precision Control

Applications

Primary Applications

- High-rise building construction
- Bridge infrastructure projects
- Large-scale engineering sites
- Space-constrained job sites
