

320 HP Crawler Bulldozer

This 320 HP crawler bulldozer is designed for heavy-duty earthmoving applications. Its hydraulic system ensures precise control and smooth operation, while its robust construction guarantees durability.

ADDITIONAL IMAGES

Overview

Built for heavy-duty earthmoving applications with superior traction.

High-Performance Crawler Bulldozer

This 320HP crawler bulldozer is engineered for heavy-duty earthmoving, mining, and large-scale infrastructure projects. Featuring a high-reliability Cummins engine and a robust box-type main frame, it delivers superior power, stability, and durability under demanding load conditions. With an advanced integrated instrument panel and precise hydraulic control, this machine is designed for both high productivity and operator comfort.

Engine Specifications

Rated Power

345 HP
Horsepower

257 kW
Rated Power

| | |
|----------------------|---------------------|
| Engine Model | Cummins NTA855-C360 |
| Rated Speed | 2000 r/min |
| Min Fuel Consumption | 207 g/kW-h |

Hydraulic System

Precision hydraulic control system for optimal productivity.

Working Pressure

14 MPa

Rated Flow

360 L/min

Features

Durable blade design for efficient pushing and site preparation.

Key Advantages

Heavy-duty construction, High-efficiency hydraulic system, Turbocharged engine, Diagnostic monitoring, Excellent heat management
