

3.2G Reverse Osmosis Water Storage Tank

This 3.2G water storage tank is for reverse osmosis systems. It maintains water pressure, providing on-demand dispensing of purified water.

Overview

Reliable Reverse Osmosis Water Storage

This 3.2G water storage tank is designed for both residential and commercial reverse osmosis systems, ensuring a steady supply of purified water. It effectively maintains water pressure for on-demand dispensing, providing a consistent flow whenever needed. Built for durability and performance, it is a critical component for high-quality water purification setups.

Technical Specifications

Key Performance Metrics

3.2 G

Capacity

100 psi

Max Working Pressure

7 psi

Max Air Charge

Model Number	RO-3.0G 091209
Required Air Charge	5-7 psi

Product Range

Available Tank Sizes

- 2.0G
- 3.0G
- 3.2G
- 4.0G

Applications

Compatible Systems	Residential RO, Commercial RO, Water Purification, Pressure Storage
--------------------	---

Manufacturing Details

Production Standard	Full process manufacturing from raw materials to finished product
---------------------	---
