

3.2T Wheel Loader with 1.8m³ Bucket

This wheel loader has a 3.2T rated load and a 1.8m³ bucket capacity. Its improved hydraulic system and transmission deliver high performance.

Overview

High-Efficiency Wheel Loader

This compact yet powerful wheel loader is engineered to deliver exceptional productivity and fuel efficiency in demanding environments. Featuring a robust engine with high torque output, it ensures reliable performance for material handling tasks. The optimized hydraulic system and transmission provide superior control and comfort for the operator, making it an ideal choice for construction, mining, and agricultural applications.

Engine Specifications

Engine Model	Cummins 6BT5.9
Engine Type	Vertical, water cooled, four-stroke, direct injection
Rated Power	97 KW
Rated Speed	2200 rpm
Displacement	5.9 L

Performance

Peak Torque

560 N·m

Peak Torque

Rated Fuel Consumption	235 g/KW·h
------------------------	------------

Main Technical Specifications

Rated Load	3200 Kg
Operating Weight	10000 Kg
