

# 32x Magnification Automatic Optical Level

This precision optical level is designed for accurate leveling and alignment in construction and surveying. Featuring 32x magnification, the level provides clear, detailed views, while its automatic self-leveling mechanism ensures quick, easy setup.

## Product Overview

### Precision Optical Leveling

This automatic optical level is designed for high-precision leveling and alignment tasks in construction and surveying. Featuring a 32x magnification, it provides clear, detailed views for accurate readings. The integrated automatic self-leveling mechanism ensures quick setup, while the IP54 protection rating ensures durability against splashes in various job site conditions.

## Technical Specifications

### Protection Class

IP54

### Key Features

- Automatic self-leveling mechanism
- Precise rotation control
- Splash-resistant housing

### Magnification

32 x

## Package Contents

### What's in the box

The sales package includes the optical level instrument. Please note that any accessories not explicitly listed in the delivery set are not included.
