

33-Piece High Voltage Insulated Tool Set

This 33-piece tool set is designed for work on high voltage electrical systems. It includes a range of insulated wrenches, screwdrivers, pliers and other essential tools for electricians, technicians, and engineers.

Product Overview

Professional High Voltage Safety Set

This comprehensive 33-piece high voltage insulated tool set is engineered for professionals working in electrical maintenance, power generation, and distribution sectors. Each component is designed to provide critical protection against electrical shock, ensuring user safety during live-line work. The set includes a versatile range of wrenches and keys, making it an essential kit for electricians and technicians requiring reliable, industry-compliant tools.

Total Pieces	33 pcs
