Product Overview

Compact and Efficient Air Power

This 3/4 HP direct drive air compressor is designed for reliable performance in both home and light-duty commercial environments. Featuring a compact and durable construction, it provides efficient power transfer for tasks such as inflation, airbrushing, and operating small pneumatic tools. The unit is equipped with essential safety features, including a pressure relief valve and an automatic shut-off mechanism, ensuring secure operation for the user.

Technical Specifications

Motor Power

0.75 HP
Horsepower

Tank Capacity

6 L

Drive System

Direct Drive

Compliance & Safety

Safety Features

- Pressure relief valve
- Automatic shut-off mechanism

Certifications

ISO9001

Applications

Typical Applications

Pneumatic tools • Tire inflation • Spray guns • Airbrushing
