

3/4 Inch Threaded Ball Valve

This ball valve features a 3/4 inch threaded connection and a quarter-turn handle for on/off control. The valve is constructed from durable metal, making it suitable for fluid control applications in plumbing and industrial systems.

Product Overview

Reliable Flow Control

This 3/4 inch threaded ball valve is engineered for efficient and reliable flow regulation in both plumbing and industrial systems. Featuring a robust metal construction, it offers long-term durability for demanding fluid control applications. The quarter-turn handle design ensures quick and easy on/off operation for seamless integration into your piping infrastructure.
