

34m Ocean-Going Tugboat with Dual 1600HP Engines

This ocean-going tugboat measures 34 meters in length and is powered by two 1600HP engines. It is designed for heavy-duty towing and various offshore operations.

Overview

34m Ocean-Going Tugboat

This 34-meter ocean-going tugboat is engineered for heavy-duty towing and demanding offshore operations. Equipped with dual 1600HP engines, it provides the necessary power for ship handling, salvage missions, and comprehensive offshore support. Its robust hull design and advanced navigation systems ensure reliability and performance in challenging maritime environments.
