

#35 Finished Bore Sprocket with B-Hub

This #35 finished bore sprocket is designed with a 3/8" bore and a 1.260" outer diameter. It features a Type B-Hub on one side for proper alignment and stability.

Product Overview

Precision #35 Finished Bore Sprocket

This #35 finished bore sprocket is precision-engineered for reliable performance in power transmission systems. Featuring a 3/8" pitch and a single-strand configuration, it is designed for durability and efficient chain engagement. The Type B-Hub design, with the hub located on one side, ensures proper alignment and stability for demanding industrial machinery.

Technical Specifications

Sprocket Size	#35
Bore Diameter	0.375 in
Outer Diameter	1.26 in
Pitch	0.375 in
Strand Configuration	1 Strand
