

3.5-inch Server Hard Drive Tray Caddy

This server hard drive tray caddy is designed to securely mount and house a standard 3.5-inch hard drive within a server chassis. Constructed from durable metal, it provides a stable platform for the hard drive, minimizing vibration and ensuring reliable data storage.

Overview

Professional Server Storage Solution

This server hard drive tray caddy is designed to securely mount and house a standard 3.5-inch hard drive within a server chassis. Constructed from durable metal, it provides a stable platform that minimizes vibration and ensures reliable data storage. The integrated sliding mechanism allows for quick and efficient insertion or removal, making it an ideal solution for expanding or replacing server storage capacity.

Technical Specifications

Compatible Drive Size	3.5-inch
Material	Durable metal
Key Features	Robust build quality, Secure mounting, Vibration reduction, Easy sliding mechanism
Primary Application	Server chassis storage expansion and replacement
